

Grand Canyon National Park Lodges is proud to coordinate with Grand Canyon Conservancy and the National Park Service to Grand Canyon National Park's status as an officially certified International Dark Sky Park.

To preserve our pristine dark skies external lights throughout Grand Canyon Village are dark sky compliant which includes shielding and directing light downward. Using a flashlight while navigating the village after dark can enhance your vision and maintain our dark skies for others.

For information on how to best enjoy dark skies at Grand Canyon National Park scan QR codes below:
